PROFILE

Aspiring Data Science and AI/ML professional with hands-on project and internship experience in Python, data analysis, machine learning, NLP, and predictive modeling. Built end-to-end applications using Pandas, NumPy, Scikit-learn, Streamlit, FastAPI, and MongoDB. Comfortable with data cleaning, EDA, model evaluation, REST APIs, and building simple ML applications. Seeking Data Science, AI/ML, and related internship roles.

TECHNICAL SKILLS

Programming: Python, Pandas, NumPy

Data Analysis: EDA, data cleaning, statistics, feature preprocessing, data visualization

Machine Learning: Scikit-learn, regression, classification, clustering, model evaluation

NLP: Transformers, Hugging Face, text classification, sentiment analysis

Visualization: Matplotlib, Seaborn, Plotly

Development: Streamlit, FastAPI, REST APIs, Uvicorn

Database & Tools: MongoDB, MongoDB Atlas, Git, GitHub, Jupyter, Google Colab, VS Code, Kaggle

EXPERIENCE

Data Science Intern — CodeAlpha | Remote | June 2026 – July 2026

- Completed three classification tasks using Iris, Car Data, and Advertising datasets.
- Cleaned and prepared datasets for analysis and model training.
- Applied EDA and data visualization to understand patterns and features.
- Built and evaluated machine learning models using Python and Scikit-learn.
- Documented and maintained internship work in GitHub.

SELECTED PROJECTS

VoltSense AI — Electricity Usage Prediction | Python · ML · FastAPI · MongoDB · Streamlit

- Built an ML application to predict electricity usage periods and identify peak and low times.
- Used Linear Regression and Random Forest for prediction and model comparison.
- Created REST API endpoints with FastAPI and connected the API with the application.
- Used MongoDB Atlas to store application data and prediction history.
- Deployed the Streamlit user interface with a live online demo.

[GitHub](#) · [Live Demo](#)

Telco Customer Churn Prediction | Python · Scikit-learn · Streamlit

- Built an end-to-end churn prediction workflow from data cleaning to model evaluation.
- Handled missing values and categorical features during preprocessing.
- Trained a Random Forest classifier and evaluated it using accuracy and ROC-AUC.
- Created a Streamlit dashboard for EDA and customer churn prediction.

[GitHub](#) · [Live Demo](#)

SELECTED PROJECTS — CONTINUED

Global AI/ML Salary Analysis | Python · EDA · Regression

- Analyzed 40,332 AI/ML job records to study salary patterns across roles, countries, and experience levels.
- Removed duplicate records and prepared the cleaned data for analysis and modeling.
- Compared Linear Regression and Random Forest for salary prediction.
- Evaluated models using MAE, RMSE, and R².

[GitHub](#) · [Live Demo](#)

FIFA 2026 Player Performance | Python · ML · Streamlit

- Analyzed player data to find performance patterns and trends.
- Performed data cleaning and EDA using Python and Pandas.
- Compared Linear Regression, Decision Tree, and Random Forest models.
- Built a Streamlit dashboard for analysis and prediction.

EDUCATION

Intermediate — Pre-Engineering | Government Degree College & P.G. Center, Latifabad No. 11 | 2024–2026

Result Awaited

Artificial Intelligence & Data Science | Saylani Mass IT Training (SMIT) | 2025–2026

Completed; Certificate Awaited

CERTIFICATIONS & VIRTUAL EXPERIENCE

- CodeAlpha — Data Science Internship Certificate
- HP LIFE — Data Science & Analytics
- British Airways — Data Science Job Simulation, Forage

ADDITIONAL PROJECT

500 AI Companies Analysis | Python · EDA

- Analyzed AI company data to explore company locations, funding, valuation, industries, and market trends.
